

Prevention Toolkit

Welcome to the Standing Strong Against Falls Fond du Lac County Falls Coalition Toolkit, developed to meet the needs of local communities within the Fond du Lac County Area. The resources provided in this toolkit were compiled from the coalition help you and your family members address your risks of falls.

Falls are NOT a normal part of aging. Falls can lead to loss of function, independence, and accelerate death. While you or your family member may be at an increased risk for falls many factors are modifiable, and falls can be prevented. The Center for Disease Control (CDC) and the American Geriatrics Society (AGS) recommend that adults over the age of 65 receive a fall risk screening at least annually. In addition to the resources included within this folder, please reach out to your local community contact for additional information:
